TIMELESS ELEGANCE

Energieker: an international protagonist of Made in Italy in the ceramic district

Energieker: protagonista internazionale
del Made in Italy ceramico

Energieker is the synthesis of a long ceramic tradition. The brand was founded in 1997 from the relaunch of an industrial enterprise active since 1986. Since then, it has established itself as an international leader in Italian ceramic excellence, with porcelain stoneware collections crafted with attention to every detail, produced entirely at the Pavullo plants. Cutting-edge technological facilities and continuous investments support a production range that extends from large slabs to traditional sizes, accompanied by meticulous service and a showroom of over 1,200 sqm serving as a meeting point and source of inspiration for clients and designers from all over the world.

Energieker è la sintesi di una lunga storia ceramica. Il marchio è nato nel 1997 dal rilancio di una realtà industriale attiva dal 1986. Da allora, si è affermato come protagonista internazionale del Made in Italy ceramico, con collezioni in gres porcellanato curate in ogni dettaglio, prodotte interamente negli stabilimenti di Pavullo. Impianti tecnologici all'avanguardia e investimenti costanti sostengono una produzione che spazia dalle grandi lastre a formati tradizionali, con un servizio curato in ogni dettaglio e uno showroom di oltre 1.200 mq come punto di incontro e ispirazione per clienti e progettisti da tutto il mondo.

For us, sustainability is a concrete concept: photovoltaic system with 4000 kWp/h capacity, 100% recycling of water and processing waste, international certifications, safety in the workplace, attention to the well-being of employees, logistics center. All this translates into a sustainable presence in the area and into a virtuous circle between company, designers, customers and end users.

Per noi la sostenibilità è un concetto concreto: impianto fotovoltaico da 4000 kWp/h, riciclo del 100% dell'acqua e degli scarti di lavorazione, certificazioni internazionali a garanzia dei processi, sicurezza sul luogo di lavoro e attenzione al benessere dei dipendenti e un polo logistico dedicato. Un insieme di scelte che si traduce in una presenza responsabile sul territorio e in un circolo virtuoso tra progettisti, clienti e utilizzatori finali.

Imperial

Imperial was created with the idea of offering new compositional possibilities through square and rectangular formats that can be freely combined. Matte-finished surfaces with a 9 mm thickness transform into elegant and dynamic combinations, designed for floors and walls that combine essentiality with design versatility.

Imperial nasce dall'idea di offrire nuove possibilità compositive attraverso formati quadrati e rettangolari da mixare liberamente. Superfici in finitura matt e spessore 9 mm si trasformano in combinazioni eleganti e dinamiche, pensate per pavimenti e rivestimenti capaci di coniugare essenzialità e versatilità progettuale.

Tivoli

Stone Look
by Energieker

The timeless character of travertine comes to life in Tivoli, with surfaces that reflect the natural richness of the stone. Warm tones are interpreted with balance, while the formats - designed to create elegant laying patterns - expand compositional possibilities for residential and public spaces defined by continuity and stylistic coherence.

Il carattere senza tempo del travertino rivive in Tivoli, grazie a superfici capaci di restituire la naturale ricchezza della pietra. Le tonalità calde sono interpretate con equilibrio mente i formati, studiati per realizzare eleganti schemi di posa, ampliano le possibilità compositive, per spazi residenziali e pubblici caratterizzati da continuità e coerenza stilistica.

HiSense

HiSense is the technology developed in Energieker's laboratories that improves slip resistance without compromising softness or aesthetics. Microparticles fill the ceramic's microcavities, creating velvety surfaces that are safe and easy to clean. Perfect for both indoor and outdoor use, it ensures stylistic continuity and functionality in any architectural context.

HiSense è la tecnologia sviluppata nei laboratori Energieker che migliora le prestazioni antiscivolo senza compromettere morbidezza ed estetica. Le microparticelle riempiono le microcavità della ceramica, creando superfici vellutate, sicure e facili da pulire. Perfetta per interni ed esterni, garantisce continuità stilistica e funzionalità in qualsiasi contesto architettonico.

HiReal

HiReal is the new technology for three-dimensional ceramic modeling that enhances depth and material details while faithfully following the surface design. The result is an extremely realistic effect that highlights every element with natural depth. Advanced application techniques also guarantee strength and durability, preserving the beauty of ceramics over time.

HiReal è la nuova tecnologia per la modellazione ceramica tridimensionale che esalta profondità e dettagli materici, seguendo con fedeltà la grafica della superficie. Il risultato è un effetto estremamente realistico che valorizza ogni elemento con naturale profondità. Le tecniche di applicazione avanzate garantiscono inoltre resistenza e durata, preservando la bellezza della ceramica nel tempo.

The image shown is for illustrative purposes only. As with natural marble slabs, Bookmatch patterns may present vein discontinuities between one slab and another. For this reason, differences of up to 1.5 cm are to be considered normal product characteristics. L'immagine rappresentata è a puro scopo illustrativo. Come per le lastre di marmo naturale, anche le grafiche Bookmatch possono presentare discontinuità tra una lastra e l'altra. Per questa ragione, differenze fino a 1,5 cm sono da considerarsi normali caratteristiche del prodotto.

A joint width of 4–5 mm is recommended. Since these are multi-caliber products, it is advisable to make any necessary adjustments during installation in order to best enhance the authentic and irregular appearance of the natural material.
È consigliata una fuga di 4-5 mm. Trattandosi di prodotti multicalibro, si raccomanda di eseguire eventuali regolazioni in fase di posa, al fine di valorizzare al meglio l'aspetto autentico e irregolare del materiale naturale.

With Tivoli and Pietra del Salento, material takes on a new authenticity. A sophisticated edge treatment shapes every tile, giving it an irregular profile reminiscent of the artisanal craftsmanship of the past. No piece is identical to another: each surface tells a different story, rich in details and nuances. Available in all colors and in formats 20×20, 20×40, 40×40 and 40×60, these collections are designed to create versatile and always original laying patterns.

To fully enhance their beauty, a 4–5 mm joint is recommended, bringing out the irregular rhythm of the edges. The choice of grout can amplify the desired effect: tone-on-tone for a harmonious, natural look, or in contrast for a more contemporary and striking accent.

As these are multi-caliber products, it is advisable to make any necessary adjustments during installation, in order to best highlight the authentic and irregular character of natural material.

Con Tivoli e Pietra del Salento, la materia si veste di autenticità. Un sofisticato trattamento dei bordi plasma ogni piastrella, donandole un profilo irregolare che richiama la cura artigianale delle lavorazioni di un tempo. Nessun pezzo è identico all'altro: ogni superficie racconta una storia diversa, fatta di dettagli e sfumature. Disponibili in tutti i colori e nei formati 20×20, 20×40, 40×40 e 40×60, queste collezioni sono pensate per dare vita a schemi di posa versatili e sempre originali.

Per esaltarne appieno la bellezza, si consiglia una fuga di 4-5 mm, capace di valorizzare il ritmo irregolare dei bordi. La scelta dello stucco può amplificare l'effetto desiderato: tono su tono per un insieme armonico e naturale, oppure a contrasto per un accento più contemporaneo e deciso.

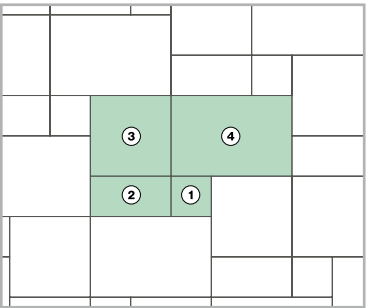

Trattandosi di prodotti multicalibro, si raccomanda di eseguire eventuali regolazioni in fase di posa, al fine di valorizzare al meglio l'aspetto autentico e irregolare del materiale naturale.
