Energieker
The Company

Energieker: an international protagonist of Made in Italy in the ceramic district

Energieker: protagonista internazionale
del Made in Italy ceramico

Energieker is the synthesis of a long ceramic tradition. The brand was founded in 1997 from the relaunch of an industrial enterprise active since 1986. Since then, it has established itself as an international leader in Italian ceramic excellence, with porcelain stoneware collections crafted with attention to every detail, produced entirely at the Pavullo plants. Cutting-edge technological facilities and continuous investments support a production range that extends from large slabs to traditional sizes, accompanied by meticulous service and a showroom of over 1,200 sqm serving as a meeting point and source of inspiration for clients and designers from all over the world.

Energieker è la sintesi di una lunga storia ceramica. Il marchio è nato nel 1997 dal rilancio di una realtà industriale attiva dal 1986. Da allora, si è affermato come protagonista internazionale del Made in Italy ceramico, con collezioni in gres porcellanato curate in ogni dettaglio, prodotte interamente negli stabilimenti di Pavullo. Impianti tecnologici all'avanguardia e investimenti costanti sostengono una produzione che spazia dalle grandi lastre a formati tradizionali, con un servizio curato in ogni dettaglio e uno showroom di oltre 1.200 mq come punto di incontro e ispirazione per clienti e progettisti da tutto il mondo.

For us, sustainability is a concrete concept: photovoltaic system with 4000 kWp/h capacity, 100% recycling of water and processing waste, international certifications, safety in the workplace, attention to the well-being of employees, logistics center. All this translates into a sustainable presence in the area and into a virtuous circle between company, designers, customers and end users.

Per noi la sostenibilità è un concetto concreto: impianto fotovoltaico da 4000 kWp/h, riciclo del 100% dell'acqua e degli scarti di lavorazione, certificazioni internazionali a garanzia dei processi, sicurezza sul luogo di lavoro e attenzione al benessere dei dipendenti e un polo logistico dedicato. Un insieme di scelte che si traduce in una presenza responsabile sul territorio e in un circolo virtuoso tra progettisti, clienti e utilizzatori finali.

Organic markings punctuate the surface, bearing witness to a slow, natural layering that enhances its depth and contrast. A dense, textured material that conveys the passage of time through its very grain, in a design that strikes a balance between precision and uniqueness.

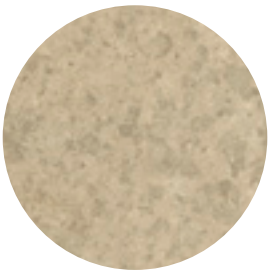

Segni organici punteggiano la superficie, testimonianza di una stratificazione lenta e naturale che ne accentua profondità e contrasto. Una materia densa e articolata, capace di raccontare il tempo attraverso la sua stessa grana, in un disegno che trova equilibrio tra struttura e unicità.

Thermoforming technology allows Energieker porcelain stoneware to be applied to curved surfaces, pushing the material beyond its traditional limits. The surface flows seamlessly across soft, sculptural forms, enhancing volumes and contours through a sense of visual continuity. This innovative process expands the creative potential of the Abito product range, opening up new ways to use porcelain in interior design.

La tecnologia di termoformatura consente di applicare il gres porcellanato Energieker anche su superfici curve, superando i tradizionali limiti della materia. Le superfici si modellano e seguono forme morbide e avvolgenti, creando una continuità visiva capace di valorizzare volumi e geometrie. Una soluzione innovativa che amplia le possibilità progettuali della linea di prodotti Abito e apre a nuove interpretazioni del gres nel mondo dell'interior design.
